TOTALMobility for VMware Workspace ONE®

Get the full value of VMware Workspace ONE® UEM, Identity, Privacy and more in any Android and iOS app.

THE DIGITAL WORKPLACE IN THE MOBILE ERA

The demand for mobile apps in the enterprise is growing rapidly. Mobile infrastructures, systems, vendor solutions, and standards for access, authentication, management, security and more are evolving quickly. Organizations need greater compatibility, capability and intelligence in mobile apps now. Mobile app developers, mobile IT, and enterprise security teams need better ways to deliver consistently high quality, secure, managed and BYOD mobile app experiences for all users.

TOTAL MOBILITY FOR WORKSPACE ONE

Appdome's TOTALMobility™ for Workspace ONE is a VMware validated solution that delivers the full range of VMware's Workspace ONE UEM, Intelligence and Privacy SDKs as well as direct integrations with VMware's Secure Browser, Secure Email and Document Sharing using a single, easy to use, no-code solution.

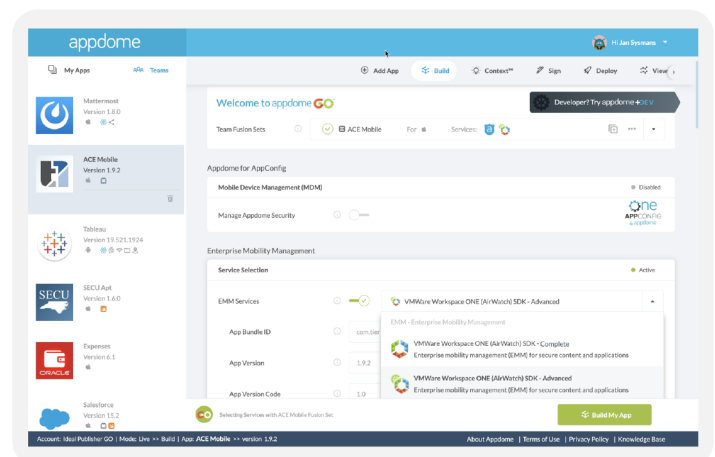

Using TOTALMobility™ for Workspace ONE, customers can quickly and easily build apps with any combination of Workspace ONE features. Appdome automatically builds the VMware SDKs and APIs into mobile apps. It creates secure data and credential stores, extends VMware features to all native apps and non-native frameworks (like Xamarin, Cordova and React Native), and ensures compatibility with modern methods (like advanced WKWebView, Avplayer, Push Notification and other support). It also shields the app from reversing and tampering to protect mobile apps and users from compromise, all without any code or coding on the part of the user.

DEV-TOOLS FOR WORKSPACE ONE

TOTALMobility™ for Workspace ONE supports a rich developer tool kit including routing control, encryption optimization, 3rd party app mobile permission control, automated build-to-publish app lifecycle APIs for CI/CD (like Jenkins, Travis and more) and automated publishing to public app stores and the VMware Enterprise Catalog.

NO WRAPPING, NO MANUAL CODING

Appdome is the fastest, easiest and best way to add any mobile service SDK to Android and iOS apps. The resulting implementations function as if a team of mobile developers built the services inside the app, all without the user writing a single line of code. Appdome's no code framework is more robust and resilient than app wrapping, which can impact reliability, compatibility, and performance of the app. Tens of thousands of Appdome apps are currently published on public and private app stores.

BENEFITS OF USING AI TO BUILD MOBILE APPS

Appdome's industry defining, self-service SaaS platform uses a patented, AI enhanced, coding engine to build the target feature set into a mobile app in about a minute.

What sets Appdome apart is its ability to dynamically learn and understand the target application and feature set, build only what is required, adding new workflows and methods, to deliver the functionality in the app. The result is a mobile app optimized for Workspace ONE and its partner's products, every time.

SINGLE SOLUTION FOR DEVELOPERS AND IT

Appdome offers a single, easy to use, no-code mobile solution and integration platform for developers, enterprise IT and security professionals. All users simply upload any app binary (.apk or .ipa). Select the services required for the app and click "Build my App".

Using Appdome, mobile stakeholders can bring the full power of Workspace ONE to native, cross-platform, hybrid and non-native Android and iOS apps, eliminate dependencies and guarantee compatibility build by build.

| TOTALMOBILITY™ FOR WORKSPACE ONE | COMPLETE | ADVANCED |
|---|----------|---------------|
| SERVICE COVERAGE | | |
| Workspace ONE UEM SDK - No-Code, Full SDK | ✓ | ✓ |
| All iOS and Android apps - native, cross-platform, hybrid | ✓ | ✓ |
| Appdome Mobility Control (Rule based routing, encryption control, etc.) | ✓ | ✓ |
| Workspace ONE Intelligence SDK - No-Code, Full SDK | | ✓ |
| Workspace ONE Privacy SDK - No-Code, Full SDK | | ✓ |
| TUNNELING | | |
| All Workspace ONE Tunneling (SDK Equivalent) | ✓ | ✓ |
| Appdome Advanced Tunneling Support (Webviews, Safari ViewControls, Background Tasks, Proxy PAC, Push, etc.) | | ✓ |
| DATA PROTECTION | | |
| Workspace ONE Data at Rest Encryption (SDK equivalent) | ✓ | ✓ |
| Workspace ONE DLP Policy & Protection (SDK equivalent) | ✓ | ✓ |
| Workspace ONE Privacy Camera & Blur Screen (SDK equivalent) | ✓ | ✓ |
| Appdome Advanced Data Protection (All Files and DB AES 256, Bluetooth DLP, iOS Data backup and more) | | ✓ |
| Enterprise Mobility Control (Disable screen capture, camera, mic, restrict calls, contacts, calendar, location, etc) | | ✓ |
| AUTHENTICATION | | |
| Workspace ONE Password (SDK equivalent) | ✓ | ✓ |
| Workspace ONE Integrated Authentication SSO (SDK equivalent) | ✓ | ✓ |
| Appdome for Workspace ONE Advanced Authentication and SSO | | ✓ |
| BoostEMM™ | | |
| Enforce Workspace ONE Secure Browser | | ✓ |
| Enforce Workspace ONE Secure Email | | ✓ |
| Enable Secure Document Sharing with Trusted Apps | | ✓ |
| ADVANCED APP SECURITY | | |
| Appdome ONEShield™ for mobile app integrity providing Anti-tampering, Anti-reversing, Anti-debug plus structure/integrity scan, checksum validation | ✓ | ✓ |
| Appdome Advanced Jailbreak and Root Prevention providing Root Hiding, SELinux Enforcement, Frida and more | | ✓ |
| APP LIFECYCLE | | |
| Mobile App Branding, Configuration, Private URLs w/Context by Appdome | ✓ | ✓ |
| Automated Mobile App-Signing | ✓ | ✓ |
| Appdome-GO for IT/Security Teams (per app implementation templates, team collaboration, entitlements & auto-deploy to Workspace ONE or public app stores) | | ✓ |
| Appdome-DEV for app developers (All Appdome-GO features + advanced developer options, private signing, CI/CD integration, etc) | | w/Appdome-DEV |
| SUPPORT | | |
| 2 Appdome Platform Admin Accounts | ✓ | ✓ |
| Enterprise Ideal Support (24x7x365) | ✓ | ✓ |
| Premium Dev-Class Support | | w/Appdome-DEV |
