

Appdome for IBM MaaS360

Add MaaS360 to Mobile Apps in Minutes, No Code Required

With Appdome, IBM customers can easily integrate any mobile application with the MaaS360 SDK, in minutes and without needing access to source code.

Using Appdome, enterprise customers integrate the full-stack IBM MaaS360 service functionality into native and hybrid mobile apps, in minutes without any coding. This advanced capability, available only from Appdome, allows for an app built in any framework to be delivered to users with complete feature parity between iOS and Android.

As with all integrations completed on Appdome, customers can deploy fused apps using their existing enterprise app store. After adding the MaaS360 service via Appdome, customers can provision, manage and secure the app using their existing MaaS360 environment. Mobility professionals (i.e. mobile developers, IT, Operations, or Security) can implement

IBM MaaS360

the full IBM MaaS360 service to any iOS and Android app in just a few minutes, using Appdome's simple point and click web interface.

Appdome is a much faster and more efficient method for integrating IBM MaaS360 to iOS and Android apps than manual integration or legacy app wrapping. Customers simply upload an .ipa or .apk app binary to Appdome, select the MaaS360 service, and click "Fuse My App". Within seconds, a user gets a new app binary, integrated with the complete MaaS360 SDK.

Appdome's Fusion technology works with any app 'out of the box' (custom, private and/or ISV apps) and does not require any additional work or plug-ins to support any framework.

APPDOME FUSION PROCESS

Appdome's Fusion technology provides no-code instant integration of the IBM MaaS360 SDKs with any mobile app. Customers can add the IBM MaaS360 SDK and additional services to support their specific use cases. Other services include the Appdome Mobility Suite, Mobile App Pre-Authentication support for KCD, Single Sign-On support, and multi-factor authentication. The entire Fusion process takes less than a minute. The Fused apps can be deployed and managed through the IBM MaaS360's EMM or public app stores.

APPDOME MOBILITY SUITE

Appdome Mobility Suite extends support for the IBM MaaS360 SDK to mobile apps using VoIP, legacy push methods, and more. With Appdome Mobility Suite, customers also lock down apps, limiting the app's access to corporate resources, add advanced app routing (like ProxyPAC files) and bridge the gap between SDK, use cases, and apps.

BOOSTEMM™ FOR IBM MaaS360

Customers implementing the IBM MaaS360 SDK can add other ecosystem services from IBM MaaS360. Once Fused to an app, these services operate as if they were coded natively to the app itself.

SSO - APPDOME PRE-AUTHENTICATION

Appdome's Pre-Authentication allows a Fused app to trust IBM MaaS360's authentication methods so that mobile end users only need to automatically sign into an app once. Appdome's Pre-Authentication supports Kerberos, Kerberos Constrained Delegation (KCD), SAML and OAuth.

MOBILE IDENTITY SERVICES

Appdome's Mobile Identity service category enables customers to integrate advanced authentication, mobile identity (IDaaS), biometrics, and mobile fraud detection solutions from leading third-party providers in minutes, without coding.

About Appdome

The Appdome platform enables the rapid integration of multiple third-party functions to apps, shortening the deployment cycle and connecting mobile apps to other services on demand. The codeless service operates as a mobile integration workflow in the cloud and allows users to perform integration projects on the final application package. No source code or development expertise is required. Likewise, no modifications to an app or an SDK are required to complete integration projects on the Appdome platform. The solution is currently used by the world's leading financial, healthcare and e-commerce companies to support productivity, compliance, and security for consumers and employees. Appdome was rated a Cool Vendor in Mobile Security by Gartner in 2015. For more information, visit www.appdome.com.
